10/10/2016

Federal Communications Commission Office of Engineering and Technology 7435 Oakland Mills Road Columbia, MD 21046

To Whom It May Concern:

This letter is to request Single Modular Approval in accordance with under FCC Rule Part 15.212(a)(1) for certification request under FCC ID: 2AJWF-METRIX01. This product is processor and ZigBee radio module and can be used in sensors, radio repeaters, and radio to Ethernet bridges.

Declaration of conditions.

Y/N	15.212(a)(1) Condition
Υ	(i) The radio elements of the module have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements
Y	(ii) The module has buffered modulation/data inputs (if such inputs are provided) to ensure that the
	module will comply with part 15 requirements under conditions of excessive data rates or over-
	modulation.
Υ	(iii) The module has its own power supply regulation.
Υ	(iv) The module complies with the antenna and transmission system requirements of §§15.203
	15.204(b) and 15.204(c). The antenna(s) are either permanently attached or employ a "unique"
	antenna coupler (at all connections between the module and the antenna, including the cable).
Y	(v) The module was tested in a stand-alone configuration, i.e., the module was not inside another
	device during testing for compliance with part 15 requirements. Unless the transmitter module wil
	be battery powered, it complies with the AC line conducted requirements found in §15.207. AC or DO
	power lines and data input/output lines connected to the module do not contain ferrites, unless the
	will be marketed with the module (see §15.27(a)). The length of these lines was the length typical o
	actual use or, if that length is unknown, at least 10 centimeters was used to insure that there is no
	coupling between the case of the module and supporting equipment. Any accessories, peripherals, o
	support equipment connected to the module during testing were unmodified and commercially
	available (see §15.31(i)).
Υ	(vi) The module is equipped with either a permanently affixed label or is capable of electronically
	displaying its FCC identification number.
Υ	(vii) The module complies with any specific rules or operating requirements that ordinarily apply to
	complete transmitter and the applicant has provided adequate instructions along with the module to
	explain any such requirements.
Υ	
	(viii) The module complies with any applicable RF exposure requirements in its final configuration
	The instructions provided with the module adequately explain any usage conditions or restrictions.

I acknowledge on behalf of the applicant that compliance of this module in all final configurations is the responsibility of the applicant under the condition that the integrator follows all provided installation instructions.

Sincerely,

Tom Pierson
